

JANUS HENDERSON CAPITAL FUNDS PLC – JANUS HENDERSON GLOBAL LIFE SCIENCES FUND

A2 USD ISIN IE0009355771
Key investment risks:

- The Fund's investments in equities are subject to equity market risk due to fluctuation of securities values.
- Investments in the Fund involve general investment, currency, hedging, economic, political, policy, foreign exchange, liquidity, tax, legal, regulatory, securities financing transactions related and small/ mid-capitalisation companies related risks. In extreme market conditions, you may lose your entire investment.
- The Fund may invest in financial derivatives instruments for investment and efficient portfolio management purposes. This may involve counterparty, liquidity, leverage, volatility, valuation, over-the-counter transaction, credit, currency, index, settlement default and interest risks; and the Fund may suffer total or substantial losses.
- The Fund's investments are concentrated in companies (may include small/ mid capitalization companies) with life sciences orientation and may be more volatile.
- Investors should not only base on this document alone to make investment decisions and should read the offering documents including the risk factors for further details.

Investment objective

The Fund aims to provide capital growth over the long term. The Fund invests at least 80% of its assets in shares (also known as equities) selected for their growth potential and with a life sciences orientation. The Fund may invest in companies of any size, in any country.

Fees & charges (%)

Maximum initial sales charge	5.00
Annual management charge (AMC)	1.50

Fund charges will impact the value of your investment. In particular, the ongoing charges applicable to each fund will dilute investment performance, particularly over time. For further explanation of charges please visit our Fund Charges page at www.janushenderson.com. Under some circumstances initial charges may apply. Please refer to the Prospectus for more details.

Additional fund information

Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change. Janus Henderson Global Life Sciences Fund's investment objective and policy were changed effective 29 November 2024. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. This is an Irish Investment Company regulated by the Central Bank of Ireland. Note that any differences among portfolio securities currencies, share class currencies and costs to be paid or represented in currencies other than your home currency will expose you to currency risk. Costs and returns may increase or decrease as a result of currency and exchange rate fluctuations. To obtain our prospectus and any additional information please visit our website on: www.janushenderson.com. A short-term trading fee may be applied upon exiting the fund as per the prospectus. Investment into the fund will acquire units/shares of the fund itself and not the underlying assets owned by the fund. Cash balances and exposures are based on settled and unsettled trades as at the reporting date.

Source for fund ratings/awards

Overall Morningstar Rating™ is a measure of a fund's risk-adjusted return, relative to similar funds. Fund share classes are rated from 1 to 5 stars, with the best performers receiving 5 stars and the worst performers receiving a single star. Overall Morningstar Rating™ is shown for Janus Henderson share classes achieving a rating of 4 or 5. For the Morningstar Rating category, refer to page 1 Morningstar sector. Ratings should not be taken as a recommendation. For more detailed information about Morningstar Ratings, including its methodology, please go to <https://shareholders.morningstar.com/investor-relations/governance/Compliance--Disclosure/default.aspx>.

Glossary

Beta

Beta measures how a fund or security moves in relationship to the overall market. A market has a beta of 1. If the fund/security's beta is more than 1, it moves more than the market, while a beta lower than 1 means it moves to a lesser extent than the market. A negative beta could mean the fund/security moves in the opposite direction to the market.

Price-to-book (P/B) ratio

A financial ratio used to value a company's shares. It is calculated by dividing a company's market value (share price) by the book value of its equity (value of the company's assets on its balance sheet). A P/B value <1 can indicate a potentially undervalued company or a declining business. The higher the P/B ratio, the higher the premium the market is willing to pay for the company above the book (balance sheet) value of its assets.

Price-to-earnings (P/E) ratio

A popular ratio used to value a company's shares, compared to other stocks, or a benchmark index. It is calculated by dividing the current share price by its earnings per share.

Sharpe ratio

This measures a portfolio's risk-adjusted performance. A high Sharpe ratio indicates a better risk-adjusted return. The ratio is designed to measure how far a portfolio's return can be attributed to fund manager skill as opposed to excessive risk taking.

Standard deviation

A statistic that measures the variation or dispersion of a set of values/data. A low standard deviation shows the values tend to be close to the mean while a high standard deviation indicates the values are more spread out. In terms of valuing investments, standard deviation can provide a gauge of the historical volatility of an investment.

Tracking error

This measures how far a portfolio's actual performance differs from its benchmark index. The lower the number, the more closely it resembles the index.

Weighted average market cap

The average market capitalisation of a holding, weighted by the size of that position in a portfolio or index.
