Important Risk Disclosure for TraHK

- The Tracker Fund of Hong Kong ("TraHK") is an exchange-traded fund designed to provide investment results that closely correspond to the performance of the Hang Seng Index ("Index") but its return may deviate from that of the Index.
- Investment involves risk, including risks of concentration of investments in shares in constituent companies of the Index, performance of the Index, economic, political and social developments, risks relating to investment in Hong Kong-listed stocks, and dual counter risks. Investors may lose part or all of their investments.
- Due to fees and expenses of TraHK, liquidity of the market and tracking strategy adopted by the Manager, TraHK's return may deviate from that of the Index.
- The trading price of TraHK may differ from the underlying net asset value ("NAV") per unit.
- TraHK may not be suitable for all investors. Investors should not invest based on this document only. Investors should read TraHK's prospectus including all risk factors, consider the product features, their own investment objectives, risk tolerance level and other factors, and seek independent financial and professional advice as appropriate prior to making any investment.
- The performance of TraHK, the NAV per unit and the performance by the manager and the trustee of their respective obligations are not guaranteed by the HKSAR Government. The HKSAR Government has given no guarantee or assurance that the investment objective of TraHK will be met.

Fund Objective

TraHK's investment objective is to provide investment results that closely correspond to the performance of the Hang Seng Index.
The Manager seeks to achieve TraHK's investment objective by investing all, or substantially all, of TraHK's assets in shares in the constituent companies of the Index ("Index Shares") in substantially the same weightings as they appear in the Index.

Index Description

The Hang Seng Index is composed of a representative sample of the shares of constituent companies listed on SEHK which generally have high market value and liquidity. It is designed such that it reproduces the performance of a hypothetical portfolio made up of the shares of the constituent companies with an interest in each constituent company which is always proportionate to such constituent company's market capitalisation adjusted to take into account the freefloat of the relevant shares.

Index ESG CHARACTERISTICS

According to the overall sustainability performance scores compiled by the Hong Kong Quality Assurance Agency ("HKQAA"), the constituent companies of the Hang Seng Index are responsive to stakeholders' needs and expectations.

Fund performance is calculated based on Adjusted NAV (which represents the equity only portion of the NAV and excludes undistributed net income (e.g. cash)). (Source: Adjusted NAV is provided by State Street Bank and Trust Company. Performance information is provided by the Manager.) Calendar year performance figures show by how much the fund increased or decreased in value during the calendar year being shown. Performance quoted represents past performance, which is no guarantee of future results. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. Visit www.trahk.com.hk for most recent month-end performance. Index returns are unmanaged and do not reflect the deduction of any fees or expenses. (Price Return with no dividend reinvested. Source: Hang Seng Indexes Company Limited.) Performance returns for periods of less than one year are not annualised.

Performance Chart

Nothing contained here constitutes investment advice or should be relied on as such. The value of TraHK and the income from it, if any, may fall or rise. Past performance of TraHK is not necessarily indicative of its future performance. The prospectus for TraHK is available and may be obtained from the Manager and downloaded from TraHK's dedicated website: www.trahk.com.hk. The semi-annual distributions are dependent on TraHK's performance and are not guaranteed. Investors may only redeem TraHK Units with the Manager under certain specified conditions and the listing of TraHK on the SEHK does not guarantee a liquid market for the Units. TraHK may be delisted from the SEHK.

*** The ongoing charges figure of Tracker Fund of Hong Kong ("TraHK") is an estimate calculated based on the management fee, the trustee fee and other ongoing expenses for the year ended 31 December 2023, expressed as a percentage of the Fund's average Net Asset Value for the same period. It includes the fees of the Manager and the Trustee. Please refer to the "Fees, Costs and Expenses Payable by TraHK" section in the Prospectus for details. The actual figure may be different from the estimate. This figure may vary from year to year.

Annualized based on the number of dealing days in the past 12 months when daily Tracking Difference is calculated.

this disclosure provides comparison between TraHK's NAV (which contains equities and cash) relative to the Hang Seng Index (which consists of equities only). As the Tracking Difference increases each time there is cash accrued within TraHK's NAV due to the receipt of cash from securities dividends and upon a dividend payout to investors, which are not accounted for in the Hang Seng Index, this creates an increase in the Tracking Error.

this disclosure provides comparison between TraHK's Adjusted NAV (which represents the equity only portion of the NAV and excludes undistributed net income (e.g. cash)) with the Hang Seng Index (which consists of equities only). This aims to facilitate investors' assessment on how consistently TraHK provides equity returns from capital gains or losses in line with the Hang Seng Index and in meeting its investment objective.
